

To use this pattern, use a custom paper size of 8.5" x 55", and feed five attached sheets of fanfold or banner paper to the printer for each of the two pages. Trim the left edge off of page 2 and tape together where the pattern meets in the middle.

If you need more than 55 inches, print a second copy of both pages, trim, and tape to the first set where the pattern lines up.

Do the inner hearts before the outer ones. Be sure to leave on a different line than you entered - mark them if you have trouble remembering.

Note there are two kinds of ribbons, some are drawn inside first, others outside first.
